SESSION INFORMATION

2017 FoxFire Systems Group User Group Course Descriptions

EyeMD EMR New Release

You've been waiting for it, and now it's here!

Future of FoxFire PM & FoxFire PM Version 4.1 Training

Our Practice Management system is always improving and developing. We picked out some of our most beneficial features and will be highlighting these in this training. This includes creating and electronically signing documents, adding patient recalls and more!

EyeMD EMR Imaging

We had such a blast showing you some live images at last year's meeting that we did it again! Only this time, we brought in the big guns; the TopCon Maestro OCT.

Measuring For Success

Presented by Jay Binkowitz

In today's environment it is increasingly necessary to understand what types of information we need to understand in order to make better decisions grow our businesses. Our world continues to speed up and our ability to respond and fine tune our approach is critical to our survival. With all the influences we have from managed care, staff and associates how do we know what is or is not working This course has been designed to review many of these critical points of information and how to use them to support success.

FoxFire Financials Part I: Ensuring You Will Be Paid

Our goal during this meeting is to help you better manage your clinic's financial records. By breaking these sessions into three parts, we will comprehensively cover an array of areas. This session will focus on patient electronic eligibility.

FoxFire Financials Part II: Managing Daily Operations

Financials Part II will bring us to the end of day in the clinic. We will cover how to properly close your day and prepare to send claims and complete a proper and comprehensive end of month.

MIPS Training

With all of the changes that have come to us with MIPS, we are going to highlight MIPS and all it entails in this session. We will be covering how to meet MIPS and manage your numbers.

SESSION INFORMATION

Profiting with Vision Care Plans

Presented by Jay Binkowitz

Vision care plans are confusing and frustrating. Understanding how plans work and how to maximize profitability continues to elude us. Profiting with managed care is not just about knowing the plans. It is about the combination of products, pricing, knowledge and how we present it to our patients.

Growing Your Business from the Inside Out

Presented by Jay Binkowitz

All too often we spend a lot of time on initiatives that have very little benefit to our overall business goals. This course will assess the strategic and organizational thought processes necessary to get the most out of your efforts by concentrating on those initiatives that will bring you the best results.

FoxFire Financials Part III: Don't Leave Money on the Table

We will close out our financial series with end of year, managing unpaid claims and unbilled claims.

FoxFire EDI

As we continue with the theme of keeping your practice financially healthy, we are going to give you the inside information in FoxFire EDI. This session will cover processing invalid and rejected claims, running statement cycles and managing outgoing statements, viewing and printing HCFA's and correcting claims right out of EDI!

EyeMD EMR Contact Lenses

One of the areas of the system that we can help you streamline is the process of adding contact lenses to your coding tab! In this session we will cover how to send your front desk contact lens orders, managing contact lens orders with use of Fast Plans and tying contact lens orders to visits.
